

# Claripoint™

“Seeing is Believing”

## The virtual conference package

Virtual conferences are transforming the way organisations share their intellectual property amongst employees or their members. enLive! is specifically designed for live, on line training, lectures and seminars and provides everything you need whether your organisation is new or experienced in the business of web conferences.

Whatever the nature of the session, enLive! allows people to login and attend a live session via an internet connected computer and phone, wherever they happen to be.

## Easy set up, zero risk

enLive! is an inclusive virtual conferencing package. For only £30 per person for a virtual conference of up to 90 minutes. We'll also provide all the necessary advice to optimise your virtual conference and there's no minimum commitment or number of attendees.

### Case Study (from USA)

THE FINANCIAL PLANNING ASSOCIATION

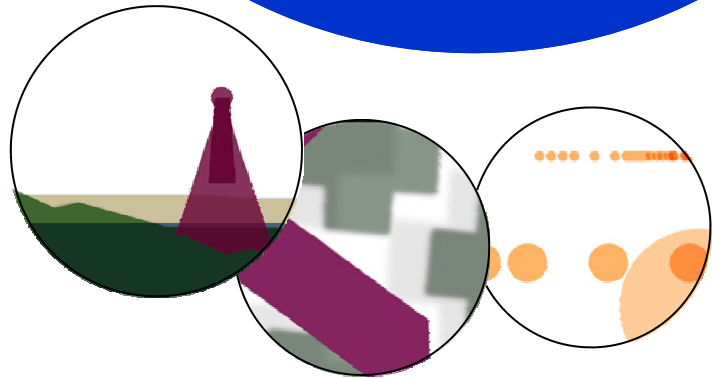

“With audiences of over 100 every week, our virtual learning centre has become a core component of our training programme.

For members who may not be able to attend physical events, on line training is an ideal way to maintain and build their CPD credits and get access to top speakers in specialist areas.

The archives of each event provide a valuable ongoing resource for all our members.”

per person

## The complete package

enLive! provides you with a 90 minute time block of:

- **Vista** – our unique award winning web conferencing platform
- **Audio conferencing** (using a normal telephone with local access from UK and major international locations)

PLUS:

- **Playback** – archives the whole event for later access via the internet
- **Training** – we'll get you up and running fast
- **White branded** – Get your brand in front of your audience
- **Event Statistics** – detailed reporting of attendance, polling and questions.

You can bring up to 200 attendees and presenters into your virtual conference with no need to book. And there's no need to worry if your session overruns, you won't be cut off!
